CAREER OBJECTIVE

Motivated and detail-oriented B.Tech Artificial Intelligence and Data Science graduate with a strong foundation in HTML, CSS, JavaScript, React.js, and responsive web development. Seeking a Frontend Developer role to apply my technical skills, build user-friendly and responsive web applications, and contribute to innovative projects while continuously improving my development skills.

EDUCATION

B.Tech, Artificial Intelligence and Data Science 2023 – 2026

Amrita College of Engineering and Technology.

CGPA: 8.61/10

HSC, Tamil Nadu State Board 2022

Gnanadeepam Matriculation Higher Secondary School.

Percentage:83.50%

SSLC, Tamil Nadu State Board 2020

Gnanadeepam Matriculation Higher Secondary School.

Percentage:85.20%

SKILLS

- HTML 5
- CSS
- Bootstrap
- JavaScript
- jQuery
- React
- Python
- MongoDB
- GitHub

WORK EXPERIENCE

Data Science • Internship Aug 2025 - Dec 2025

Corizo, Virtual. I have worked with machine learning algorithms and data visualization tools like Pandas, Matplotlib, and Tableau and hands-on experience with real-life datasets, learned data cleaning techniques, and practiced analyzing data.

Data Analytics • Internship Jun 2025 - Jul 2025

AgileTribers Tech Solutions, Nagercoil Performed analysis on user engagement data to identify trends and provide actionable recommendations. Collaborated with the development team using Git/GitHub to help implement data-driven application enhancements.

Machine Learning • Internship Jun 2024

Suven consultants & Technology pvt Ltd, Virtual Learned machine learning algorithms and hands-on experience with ML programming (likely using Python).

PROJECT

Movie Ticket Booking System

Developed a responsive Movie Ticket Booking System using HTML, CSS, and JavaScript, enabling users to browse movies, select showtimes, and book seats efficiently. Implemented dynamic UI features and client-side logic for seat selection, booking flow, and user interaction.

Expense Tracker

Built an Expense Tracker application using HTML, CSS, and JavaScript to manage daily income and expenses with real-time balance updates. Implemented JavaScript-based CRUD operations for tracking transactions with a clean and user-friendly interface.

AI Resume Analyser

Developed and deployed a responsive AI Resume Analyzer web application using React.js, JavaScript (ES6), HTML5, CSS3, and PDF.js. Implemented client-side PDF text extraction and keyword-based resume analysis to calculate ATS-style scores, identify detected and missing technical skills, and provide improvement suggestions. Built reusable React components, managed application state, and implemented file validation, loading states, and error handling to improve usability and reliability. Used Git and GitHub for version control and source code management.

Earthquake Impact Rapid Map

Earthquake Impact Rapid Map is a real-time geospatial intelligence dashboard developed using Next.js, TypeScript, Tailwind CSS, and FastAPI. The system visualizes live earthquake events with impact radius analysis, population exposure estimation, and infrastructure overlays using interactive maps and analytics. It integrates data from USGS, OpenStreetMap, and WorldPop APIs while supporting mock-data fallback for uninterrupted functionality. The project demonstrates full-stack development, geospatial analytics, API integration, responsive UI design, and real-time data visualization skills in a production-style environment.

Hybrid CNN – Transformer based Sequential Learning for Plant Disease Classification

Developed an AI-based plant disease detection system using Hybrid CNN and Transformer architecture for accurate classification of plant leaf diseases. Implemented image preprocessing, feature extraction, model training, and real-time prediction using Python, TensorFlow, and deep learning techniques. Achieved high classification accuracy through combined local and global feature learning.

TRAININGS / CERTIFICATIONS

Full Stack Sprink: Learn, Build, Deploy Feb 2025 - Jan 2026

Kpr Institute of Engineering and Technology, Virtual, Coimbatore.

Mern Stack: June 2026 - present

Besant Technologies, Virtual, Chennai.
